- Opportunity creation
- Activity tracking

Zoho CRM

Use Cases:

- Lead management
- Customer tracking
- Automated updates

Freshworks

Use Cases:

- Ticket creation
- Support automation
- Customer communication

Shopify

Use Cases:

- Order tracking
- Customer support
- Return management

WhatsApp

Use Cases:

- Notifications
- Follow-ups
- Customer engagement

Lead Qualification Framework

The Voice Agent should ask:

1. What industry does your business operate in?
2. How many calls do you receive monthly?
3. What CRM are you currently using?
4. What challenges are you facing today?
5. Do you currently have a support or sales team?

6. What outcomes are you hoping to achieve?

Qualified Lead Indicators:

- High call volume
 - Manual follow-up process
 - Existing CRM
 - Need for automation
 - Customer support bottlenecks
-

Objection Handling

Objection

AI cannot replace humans.

Response:

AI handles repetitive conversations while human teams focus on complex interactions.

Objection

We already use a call center.

Response:

Ezora complements existing teams by reducing repetitive workload and improving consistency.

Objection

Implementation sounds difficult.

Response:

Ezora integrates with existing systems and workflows for a smooth deployment process.

Intent Taxonomy

Common customer intents:

- Product Information
 - Pricing Query
 - Integration Query
 - Schedule Demo
 - Reschedule Demo
-

- Support Request
 - Complaint
 - Lead Qualification
 - Human Handoff
-

Call Outcomes

Every call should end with one of the following outcomes:

- Demo Booked
 - Qualified Lead
 - Unqualified Lead
 - Follow Up Required
 - Not Interested
 - Escalated To Human
 - Support Resolved
 - Support Pending
 - Appointment Scheduled
 - Appointment Rescheduled
-
